ICMS PRO

Intelligent Chemical Management System

OVERVIEW:

The ICMS-PRO system offers users the highest level system available to control and record chemical consumption. System allows authorized users to log in with a 4-digit code or RFID access card/key fob to reliably dispense chemicals. Multi Step Application recipes allow for blending chemistry using calibrated time-based dispensing. Configurable User Permissions restrict access to chemistry on a per-user basis. Data is recorded to .CSV files which can be automatically emailed or manually downloaded to a USB drive

10.3" wide colour touch screen provides an easy interactive platform, making the dispensing process as smooth as possible.

ACESS ANYWARE

Online administration tools and reports can be accessed from anywhere with an Internet connection to the system for increased accountability and flexibility using the web interface.

FEATURES:

EMPLOYEE SAFETY

Take the responsibility of chemical mixing and handling off cleaning staff - Simply program your chemical formula recipes into the ICMS *PRO* system and provide access to only authorized employees.

SIMPLE AND EASY TO USE

Simple and intuitive user operation. Easy configuration using the 10.3” Wide colour touch screen.

RFID CARD ACCESS

Standard RFID card reader allows users to log into the system using swipe cards or key fobs

USER PERMISSIONS

Access to dispense product formula recipes can be limited on a per user basis on per day basis. Individual users can also be denied or restricted access to specific formula recipes for greater control over products.

CONFIGURATION FLEXIBILISTY

System can be configured to run with AODD pumps, Peristaltic pumps or Electric diaphragm pumps to suit customer specific requirements

EASY ACCESS TO INFORMATION

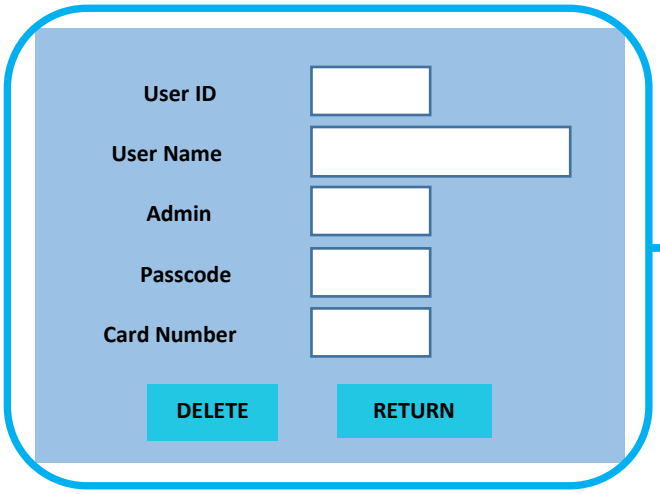
Download usage history reports to the USB drive using the sealed USB port on a daily, weekly or monthly basis (USB port is sealed to IP65 when cap is installed)

TRACK AND RECORD

Records who, what, when, and where for all Users. Create accountability and keep track of chemical usage.

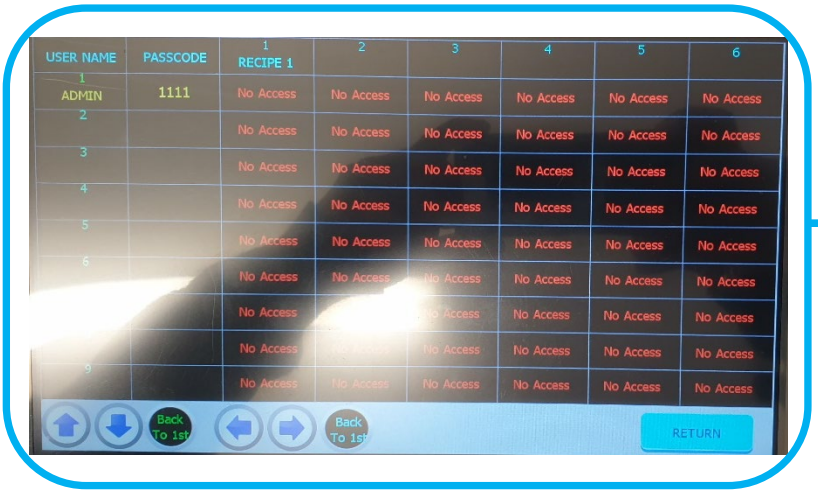
ORDERING INFORMATION:

Part Number	Description
7630540	ICMS Chemical Management System w/ Controller, 230V, Air solenoid assy. 10 position, Air filter & Proximity card reader
7146407	Swipe Card (magnetic) for ICMS
	Pumps to be configured & ordered for customer specific requirements



USER MANAGEMENT

Add and edit users, login codes, and view RFID card/FOB numbers.



USER PERMISSION MANAGEMENT

Manage user permission levels for configured product formula recipes.

PRODUCT FORMULA RECIPES

Create chemical formula recipes step-by-step by selecting the volume quantity, cost, and even specify the order in which the chemicals will be dispensed.
